

APOLLO 700 | 1000 | 1600 STATIONARY UNIVERSAL SHREDDING

HITS THE MARK.

ONLY LINDNER CLIENTS CAN TRULY SAY:

THAT'S HOW TO PUT THE SQUEEZE ON IT.

1. MOVABLE HOPPER

Easy maintenance access with a fully openable cutting chamber.

Easy and quick removal of non-shreddables thanks to our quick-locking hopper.

100% safe with sensors positioned at the maintenance access points.

2. ROBUST GEAR DRIVE

Powerful shredding with high-torque, high-performance motors.

Adapts to the material thanks to its variable speeds.

Global availability of all easy-change standard parts.

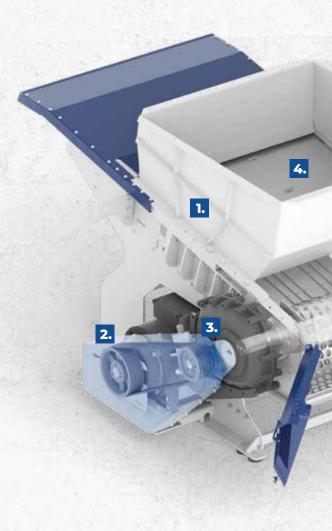

3. CUTTING SYSTEM SEAL PROTECTION

Long service life with dirt-free rotor bearings.

Ideal protection of all components ensured with our build-in seals.

No jamming thanks to special protection elements.

NAILS IT: COMPACT, EFFICIENT AND RELIABLE.

The Lindner Apollo, specially designed for in-house recycling, allows you to cost-effectively shred various types of production waste into defined particles. The combination of sophisticated machine technology and intelligent, convenient functions ensures high operational safety with easy use and maintenance. All this packaged in a compact design with maximum reliability.

4. INTERNAL RAM

Continuous shredding due to smooth rotor feeding.

Perfect for rolled goods or light-weight materials owing to our optional ram spikes.

No jamming as a result of our additional comb and sealing bars.

5. MADE-TO-MEASURE CUTTING SYSTEM

Optimised material processing owing to the customisable cutter configurations.

Ideal for heavy materials thanks to the special profile rotor design.

Consistent particles ensured with the variable cutting gap.

6. PLUG & GO SCREEN UNIT

Easy access for maintenance and fitting thanks to the swivel-mounted, hydraulically operated design.

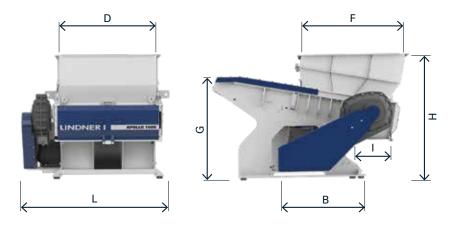

Extremely safe operation with the electromagnetically locked screen access point, preventing access to the cutting chamber while the machine is in operation.

Flexible output sizes made possible with our screen units in various mesh widths.
