Recycling Equipment Solutions

About CRJ Services

CRJ Services started in 1999, when the directors saw an opportunity to diversify from farming operations into organics recycling for the local authorities in Cheshire.

CRJ grew further with the rental of their existing recycling equipment, and the fleet expanded from there.

Today, we operate a hire fleet of over 80 shredders, screeners, picking stations, air separators and eddy current separators, with nationwide coverage.

CRJ is also the exclusive UK distributor of material processing equipment for world-renowned OEM brands, offering: shredders, screeners, sorting machinery and static plant builds from industry leading brands.

We also operate one of the largest spare part facilities for material processing equipment in the UK, stocking over £1.2m worth of genuine OEM and high-quality parts. We are able to offer our customers great quality and value whilst maintaining their equipment.

In order to maintain our own hire fleet, and support our customers machines after a sale, we have invested in an expert team of OEM-trained site based and mobile engineers.

We believe our support leaves the rest standing. Your maintenance and service plan can be tailored to your specific needs. From weekly maintenance checks to regular reviews and servicing, our team will ensure your machine is safe and working at optimum performance with longevity ensured.

CRJ is the leading hirer of mobile material processing equipment in the UK. Our equipment will shred, screen and sort waste for a variety of applications.

With the ability to process a variety of materials, our equipment helps our customers significantly reduce the amount of waste they send to landfill, as well as creating high-quality saleable products.

We are extremely flexible about how we work. From one day hires for small composters, to long term contracts with local authorities and some of the largest waste management companies in the UK.

Your machine will be delivered to site, with a thorough safety and operational briefing from a member of our specialist team.

All of our equipment is hired under adequate insurance and conforms to UK health and safety legislation, including the fitting of fire suppression systems.

We are not just about 'hiring metal'. It is our knowledge, back-up service, and the extra lengths our team go to, that keeps our customers coming back time and again.

Speak with our hire-desk team to get an understanding of how our equipment can be utilised within your operation.

CRJ is the exclusive UK and ROI distributor for world-renowned OEM brands, alongside offering a wide range of quality used machinery.

We offer a wide variety of quality material processing equipment to meet the demands of an evolving waste management industry.

Our expert sales team have extensive experience in the waste and material processing industries. Their knowledge and understanding means that we are best placed to provide you with all the information you need, to make an informed decision about your equipment purchase.

When you purchase a machine from CRJ, you will have the support of the best

after-sales team in the industry. They will work with you to create a bespoke service arrangement to suit your operation.

Working closely with all our OEM's, you will have a line of communication back to the OEM, for any technical assistance you may require.

From consultation to demonstrations, from purchase to after-sale support, we are here to support you throughout the buying cycle and beyond.

CRJ SERVICE SUPPORT

The support we offer our customers is second to none. When it comes to material processing equipment, our service support team are the experts.

All of our staff at CRJ are passionate about great customer service, and genuinely prepared to go the extra mile to ensure our customers' needs are satisfied.

We understand that each of our customers' operations are different, which is why we offer bespoke maintenance and service packages to suit your individual requirements.

Our service support team are on hand to respond to your needs within 24-hours, often the same day. The team comprises a fleet of fully equipped service vans,

manned by our OEM trained engineers, and supported by our HQ based service management team and system.

Backed up by our spare parts facility, our engineers are often able to remotely diagnose your issue, allowing them to attend your site equipped to carry out any repairs, fast.

We also have a team of support staff based at our HQ. They are in place to offer you advice and troubleshooting, to ensure your machine(s) are running safely and at maximum performance.

We have built a reputation for supplying the most premium products at affordable prices. All covered by our 24-hour delivery service.

As CRJ operate a fleet of over 80 machines, we understand the importance of using quality parts to reduce downtime and optimise performance. Therefore, we only supply genuine OEM or high-quality parts, that have been 'tried and tested' within our own fleet of machinery.

We have worked closely with a belt manufacturer to develop a range of high-quality, affordable conveyor belts. Our experience and knowledge has helped us design belts that give high performance, but also value for money.
