

Screening

Doppstadt SM518 & SM620

The Doppstadt SM trommel screens use a rotating drum to produce consistently accurate sizing of almost any waste type. High fuel efficiency, reliability and one-person operation, results in very low operating costs.

The machines produce 2 fraction sizes (screened and oversize), and quick drum changes enable you to change the screening size within minutes, from 3-150mm. Fitted with long reach and high clearance conveyors to enable greater stockpiling.

Key Features

- Accurate sizing 5 - 100mm.
- Load sensing infeed.
- Cleaning brush.
- Remote control.
- Quick drum change.
- Proven reliability.
- Low maintenance.
- High fuel efficiency.
- Long reach conveyors.
- One-person operation.
- Low operating costs.
- Engine bay fire suppression.

**“Maximising recoverable material,
consistently and effectively.”**

Screening

Doppstadt SM518 & SM620

Applications

- Green Waste
- Organic Waste
- Soil / Sand / Stone
- Wood
- Tyres
- Household Waste
- General Waste
- Industrial & Commercial Waste
- Construction & Demolition Waste

Equipment	Drum Size	Screen Size
Doppstadt SM518	4.7m x 1.8m	3 - 150mm
Doppstadt SM620	5.5m x 2.0m	8 - 70mm
