

AUTOMATICALLY TENSION BELT CLEANERS

N2® Twist™ Tensioner

Continuously maintain ideal tension for maximum belt cleaning performance without ever turning a wrench.

- Maintain proper tension with onboard sensors that inform and drive the motorized tensioner
- Reduce the need for workers to manually tension, saving time and increasing safety
- Receive notifications through our mobile app when replacement or repair is needed
- Directly retrofits onto existing Martin® Twist™ Tensioners or installs as a new assembly

ENHANCED

The intuitive new N2[®] platform is a revolutionary breakthrough in industrial smart technology for bulk materials handling applications.

N2[®] adapts familiar consumer smart technologies to the industrial environment, applying the same enhanced user experience and data-rich insight—making bulk materials handling not only cleaner, safer, and more productive, but also more intuitive and predictable.

N2[®] also reduces and limits direct human interaction with mechanical equipment and hazardous environments by providing live monitoring and allowing remote control.
